1. Getting Started

Welcome to Tegakari, a simple java based game based off of the card game Clue. This manual contains all necessary instructions to install and play Tegakari.

System Requirements:

In order to play Tegakari, your system must meet the minimum requirements below.

- Requires at least Java 7.
- An Intel 486 (or equivalent) or faster processor.
- 5 megabytes of free disk space
- 400 megabytes of physical RAM
- Mouse and Keyboard

Downloading Tegakari:

Tegakari is quick to download with most internet speeds. When you are ready to download Tegakari:

1. Go to the download page given here:

https://calpoly.repositoryhosting.com/trac/calpoly_badgers/wiki/TegakariDownload

2. On the top of the download page, click on Tegakari version 2.0 to start the download.

Removing Tegakari:

Removing Tegakari is a simple and quick process. Just follow the directions below:

1. Navigate to the folder you originally downloaded Tegakari in (most likely the downloads folder)
2. Find the Tegakari application.
3. Right click on the application and click delete.
4. Tegakari has been removed.

2. Tegakari Basics

Tegakari is a computerized version of Clue the Card Game. It is easy to navigate and to jump into for new users as well as returning users.

Starting the Game:

Starting the game is easy to do. Just follow the direction below.

1. Navigate to the folder you installed the Tegakari application to (most likely the downloads folder)
2. Double Click on the application.
3. The main window should pop up, with 'Join Lobby' and 'Help' buttons
4. Click the Join Lobby button
5. Wait for more players (if you are the first player you can add robots and change themes by clicking on their respective buttons).
6. Once you have 3 players (robots are included) then the first player can start the game.

Keyboard Controls:

Tegakari has keyboard controls for the users' convenience. Using the keyboard will let the user speed up their turns by clicking a key instead of moving the mouse manually to click a button.

To know which key to press to activate each button, look on the button itself. Each button should have text on it with a letter or word in parenthesis or lines of text nearby telling the user which keys to press to activate the buttons.

Action Cards

For directions on how each action card is played, see the SRS section 2.3 Use of Action Cards here:

https://calpoly.repositoryhosting.com/trac/calpoly_badgers/wiki/SRS

Alternatively, in the game table screen, click the Rules button.
